<b>Kid's EU</b>	26	27	28	29	30	31	32	33	34

## Additional Information About Fit

Most styles are manufactured in medium width. We offer a range of designs to accommodate a variety of foot types. Dansko also offers narrow and wide shoes in our flagship Professional clog collection.

## Fitting Dansko Closed-Back Clogs

- Fit may be slightly snug when stepping in.
- Toes should not touch the front of the clog.
- Heel should move up and down freely as you walk.

A variety of closed-back styles, offering such design features as buckles and elastic are added to styles as a design feature to accommodate both high and low insteps.

## Fitting Dansko Open-Back and Sandal Styles

- Open-back and sandal styles support the full length of the foot.
- For some wearers, the heel of the foot will meet the back end of the shoe exactly; for others, the heel may be slightly forward of the back of the shoe.

**Adjustability** is carefully considered in the design of the open-back and sandal uppers, taking the form of buckles, elasticized panels, and convertible heel straps.
